**Subject:** Superior Crude - Came off report from Falcon Refinery PRP  
**Date:** 08/17/2012 04:03 PM

---

A spill occurred on June 28, 2012 when a driver operating a Superior Crude Gathering truck caused a rupture at the end of a pipeline. The line released crude petroleum product on the ground surface. The spill was photographed by TRC and was mitigated by Superior's site workers on June 28-29, 2012. Lazarus was notified approximately 15 minutes after the incident. Lazarus subsequently contacted the Texas Spill Center to notify the state agency of the release at the site. Mr. David Smith of the Corpus Christi District of the Texas Railroad Commission arrived at the site on June 29, 2012. Mr. Smith documented the spill and provided a directive to Superior Crude Gathering Co to remediate the release. On June 29, 2012 Superior removed the free liquids from the surface and had stockpiled some of the affected soils into an area that was lined with plastic and surrounded with berms. Later that afternoon Superior continued to remove affected soil from a ditch located west of the Tank 15 berm. On July 13, 2012 the site was inspected and photographed. The excavated material was moved to an area east of the green tanks used by Superior Crude Gathering Co. The soil is within a plastic lined soil berm.
